### **DETAILED ACTION**

- 1) Acknowledgement is made of preliminary Amendment wherein applicants cancel claims 1-20. Claims 21-23 are under consideration.

#### ***Specification***

- 2) Abstract should be changed to reflect present claims.
- 3) Cross-Reference to related application should be recited on page 1 of the Specification.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

- 4) Claims 21-22, are rejected under 35 U.S.C. 102(a) as being anticipated by Mohrsen (6,387,220). Mohrsen discloses a method for treading a lead strip (a transfer tail) of web 9' from roll 10 of a preceding section, and guided by rolls 11-13, ropes 16 and 17, to calender 15. Upon start up, lead strip 9' follows a path to conveyer 20, which is mounted on frame 22. By means of vacuum the upstream end of conveyer 20 is arranged to grab the lead trip and divert it in direction transverse to the machine direction into the rope nip formed by ropes 16

and 17 at roll 13 for transfer of said lead strip through calender 15. Vacuum is obtained through hole openings in the conveyer 20 (col. 5, line 34 to col. 6, line 33, and Figures 1-2). The Mohrsen conveyer 20 mounted on frame 22 in association with rope nip at roll 13 read on the claimed threading arm assembly that includes a diverter carried by a frame and movable to divert a tail in a direction transverse to machine direction toward said rope nip.

***Allowable Subject Matter***

5) Claim 23 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for indicating allowable subject matter is that the cited prior art does not disclose a method of threading a tail wherein a diverter comprises a pivot arm and wherein a diverting step is carried out by pivoting said diverter (claim 23).

***Conclusion***

6) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190. The examiner can normally be reached on Monday to Friday.
